

2024 RESERVE STORMWATCH RED BLEND

VINTAGE NOTES

The 2024 San Simeon Reserve Stormwatch Red Blend is sourced from Stefano Vineyard in the El Pomar District and Creston Highlands and Riboli Creston vineyards in the Creston District. These sites feature well-drained, rocky soils and warm daytime conditions moderated by cool afternoon and evening breezes. Ample winter rainfall and a mild spring encouraged healthy vine development, followed by warm summer conditions and a concentrated late-season finish. The resulting fruit showed deep color, ripe dark-fruit character, and refined structure across the five Bordeaux varieties.

SUSTAINABILITY

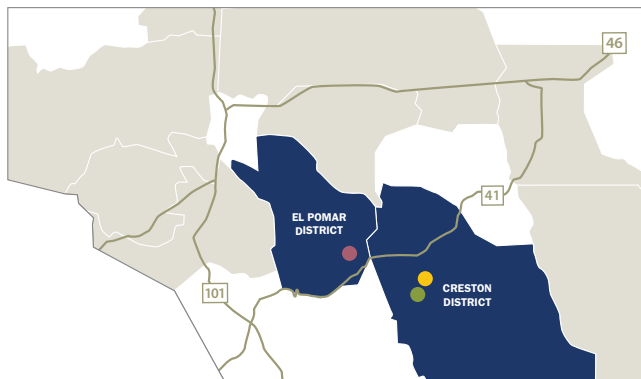

Sustainability is a top priority at San Simeon. The estate vineyards are trained using Vertical Shoot Positioning (VSP) and farmed under California Sustainable Winegrowing Alliance (CSWA)-certified practices. At the Paso Robles winery, solar panels provide 100% of the electricity needed for operations, and wastewater is reclaimed and recycled for additional use.

WINEMAKER NOTES

The 2024 San Simeon Reserve Stormwatch Red Blend brings together Cabernet Sauvignon, Malbec, Petit Verdot, Merlot, and Cabernet Franc in a layered proprietary blend. Cabernet Sauvignon anchors the wine with dense black fruit and structure, while Petit Verdot deepens the color and frame. Cabernet Franc contributes aromatic spice, and Merlot and Malbec bring supple richness through the mid-palate. The components come together in a balanced, cohesive expression of Paso Robles with a long, polished finish.
