TR100
WALL MODULE

The Honeywell TR100 Wall Module is an advanced, highly configurable device that provides building automation connectivity that is well-suited for commercial building applications, and it can meet Title 24 requirements in commercial building and classrooms. TR100 can replace existing Honeywell wall modules using the existing tools familiar to installers. The Honeywell TR100 wall modules utilize Sylk™ communication, which is polarity insensitive and uses two wires. This device also supports BACnet™ Client/Server and Modbus™ RTU communications via RS-485 bus, which is prevalent in HVAC building control systems.

Honeywell TR100 Wall Module with capacitive touch screen

Additionally, these protocols Modbus™ RTU, BACnet™ MS/TP, and Sylk™ enable future firmware updates and enhance functionality. The Honeywell TR100 Wall Module works with Honeywell and third-party controllers and is not based on proprietary protocols. The Wall Module features an attractive capacitive touchscreen interface and allows easy configuration, requiring minimal installation training. The module also features embedded help screens that make setup intuitive, reducing reliance on technical manuals for complex system setups.

FEATURES AND HIGHLIGHTS

EASY-TO-USE DESIGN

- Color, capacitive touchscreen display for intuitive, fast commissioning and exceptional user experience.
- Multiple display modes like Auto dim display mode and always on dim mode.
- An LED ring indicator to show the operational status.

MULTI-SENSOR

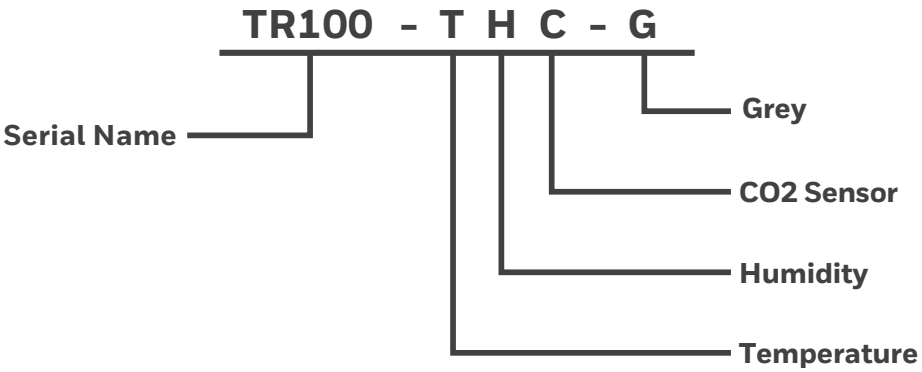

- Home screen can display one to three of any of the following parameters:
  - Temperature Setpoint
  - Room Temperature
  - Room Humidity
  - CO_2 (TR75,TR42 emulation and BACnet™ MS/TP, Modbus™ RTU)
  - Outdoor Humidity
  - Outdoor Temperature
  - One of any virtually parameter in the controller.

BUILT FOR FLEXIBILITY

- Restricted tenant access to controller parameters or imposed HVAC settings limits via password protection.
- Permanent retention of user configuration, including setpoints after a power outage.
- Ability to assign labels for enumerated values.
- Access and adjust most parameters in the Honeywell controller.
- Access and adjust the controller schedule.
- Balance the VAV system from the wall module.

REPLACEABILITY

A TR42, TR42-H, TR42-CO2, TR42-H-CO2, TR75, TR75-H, TR71, TR71-H, TR71-TH, TR120, TR120-H, TR120-TH with wall modules wired to the controller in the field can be directly replaced by the TR100-T-G, TR100-TH-G or TR100-THC-G; simply remove the old wall module and install the new wall module (including new backplate). The backplate sizes and mounting holes are identical. The TR100 will accept the TR42 or TR75 file configuration (proxy file) downloaded from the existing controller and provide the same configuration and functionality in a nicer touch screen user interface. TR100 Wall Modules can directly accept a TR42 or TR75 application download from the controller without any modifications in the controller and in the engineering tool.

GENERAL SAFETY INFORMATION

- When performing any work (installation, mounting, startup), all manufacturer instructions and in particular the Mounting and Installation Instructions Guide - 31-00673 and the User Guide - 31-00674 are to be observed.
- TR100 Wall Module may be installed and mounted only by authorized and trained personnel.
- Rules regarding electrostatic discharge should be followed.
- If TR100 Wall Module is modified in any way, except by the manufacturer, all warranties concerning operation and safety are invalidated.
- Make sure that the local standards and regulations are observed at all times.
- Use only accessory equipment which comes from or has been approved by Honeywell.
- It is recommended that out-of-the-box devices be kept at room temperature for at least 24 hours before applying power. This is to allow any condensation resulting from low shipping/storage temperatures to evaporate.
- Investigated according to United States Standard UL-60730-1, and UL60730-2-9.
- Investigated according to Canadian National Standard(s) C22.2, No. 205-M1983 (CNL-listed).
- Do not open TR100 Wall Module, as it contains no user serviceable parts inside!
- CE declarations according to EMC Directive 2014/30/EU.
- UK declarations according to Electromagnetic Compatibility Regulations 2016.
- Product standards are EN 60730-1 and EN 60730-2-9.
- TR100 Wall Module is Class B digital apparatus and complies with Canadian ICES-003.
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
- Caution: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- Prudence: Les changements ou modifications apportés à cet appareil non expressément approuvés par la partie responsable de la conformité pourraient annuler le droit de l'utilisateur à utiliser l'équipement.
- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - Reorient or relocate the receiving antenna.
  - Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - Consult the dealer or an experienced radio/TV technician for help.
- Limited by local law regulations, version for North America does not have region selection option.

SAFETY INFORMATION AS PER EN60730-1

TR100 Wall Module is intended for residential and commercial environments.
TR100 Wall Module is an independently mounted electronic control system with fixed wiring.
TR100 Wall Module is used for the purpose of building HVAC control and is suitable for use only in non-safety controls for installation on or in appliances.
