Room Humidity Transmitter — PL-RM-RH

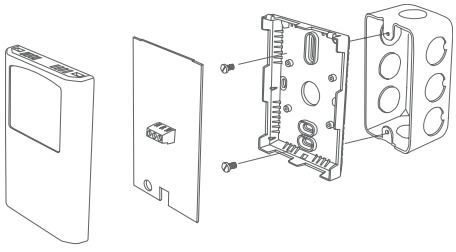

Product Description

The PL-RM-RH series room humidity transmitter uses a highly accurate and field-proven RH sensor in an attractive low profile enclosure to monitor room relative humidity levels. The RH output can be field selected as a linear 4-20 mA or 0-5 / 0-10 Vdc signal.

Typical Installation

The PL-RM-RH can be mounted directly to a single gang electrical box or directly to a wall. Multiple mounting holes are provided for connection to a variety of electrical boxes.

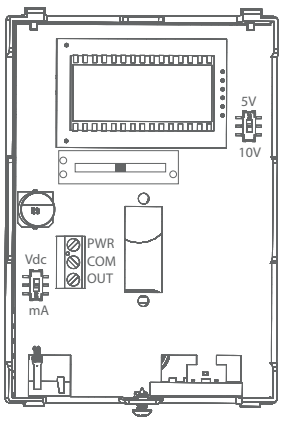

A terminal block connection is provided for connection to the Prolon Building Automation System.
