Important Notes:

IMPORTANT! Before making your shower door selection, make sure walls are finished with tile or other materials, for proper measurements.

Install this product according to the installation manual. Professional installation is recommended.

Minimum threshold depth of 2 in. is required for proper installation.

Upper and lower guiderails can be trimmed up to 4 in. for width adjustment.

ATTENTION! This model has NO adjustment for out-of-plumb (uneven) walls

DO NOT attach the handles to the door glass until instructed in the installation manual. DO NOT use the handle to lift the glass during installation. This may result in damage to the glass and/or serious injury.

Important Disclaimers:

- Prior to installation, please ensure that the installation surface is finished, level and solid and will be able to support the total weight of the unit. Also, make sure that the walls are plumb. Irregular installation, surface level or out of square conditions can result in serious problems for your installation.
- Please read Installation Manual thoroughly prior to installing this product.
- Please note that you should consult your local building codes with questions on installation compliance standards. Building and plumbing codes may vary by location, and DreamLine® is not responsible for code compliance standards for your project and will not accept any returns.

The Charisma shower door is intended for residential use only. Not suitable for commercial use.
