Trusted Protection, Great Value for Money.

3M™ VFlex™ Particulate Respirators 9100E Series provide cost-effective, single-use respiratory protection against certain particulate hazards in the workplace. Made in Europe by 3M, VFlex™ Particulate Respirators 9100E Series offers reliable protection from a trusted brand.

Constructed from 3M proprietary filter media in V-shaped pleats that both expand to increase the surface area, helping to reduce breathing resistance, and flex with facial movements for easier talking. VFlex is available in two sizes to fit a broad range of faces and folds flat in an individual product wrap for convenient and hygienic storage.

3M™ VFlex™ Particulate Respirators 9100E Series

Adjustable noseclip

- Helps provide a custom and secure seal

V-shaped pleats

- Expand to increase the surface area, helping to reduce breathing resistance, and flex with facial movements for easier talking

Spacious inside

- With comfortable inner layer

Side tabs

- Help the wearer more easily position the respirator on their face

Typical Applications

- General manufacturing
- Metalworking
- Maintenance
- Woodworking
- Pharmaceuticals/laboratory
- Construction
