**3M™ Reusable Full Facepiece
Respirator FF-300 Series**

Professional comfort and protection.

3M™ Reusable Full Facepiece Respirator FF-300 Series is a multi-function respirator designed to provide comfort and protection against a wide range of respiratory hazards.

Proven in several industrial applications, 3M™ Reusable Full Facepiece Respirator FF-300 Series utilises a T-Profile face seal design, providing an efficient seal with minimal pressure on the face. A wide panoramic visor maximises the field of vision and a front mounted speech diaphragm improves communication with colleagues. FF-300 is available in two sizes to ensure suitability for a wide range of users.

3M™ Reusable Full Facepiece Respirator FF-300 Series

Optional hard coat visor

Clear inner mask

Side fitting filter port

Available in 2 sizes

Unimpeded speech diaphragm

Professional comfort

FF-300 features a contoured T-Profile sealing edge while a sweat port in the chin pocket provides added comfort during extended periods of wear.

- ▶ The clear inner mask reduces CO₂ content within the mask
- ▶ The design helps to prevent the visor from misting by directing the airflow across the visor
- ▶ The positioning of the filter permits good downwards visibility

Professional protection

- ▶ FF-300 is made from a halo-butyl compound, providing resistance to many chemicals
- ▶ All valves in both mask variants are made from flexible, long-life silicone
- ▶ The speech diaphragm is positioned to be unimpeded by the filter, aiding clear communication

One mask for many tasks

FF-300 is a multi-function mask, serving as:

- ▶ A negative pressure single filter mask using the 3M™ DT-Series filter range
- ▶ A face piece for a powered air respirator
