There are two color bars on the proof and in the art file. One is to be used with Kudo IT Print Spectrophotometer. The other can be used with most other spectrophotometers. Printers must repeat one of the two color bars all the way across the width (grayer edge) of the press runs and production runs. Failure to comply will result in the remaining of film and/or plates at your cost. 印刷稿及设计文件包含了两组色标。一组用于Kudo IT (包含色标) 分光光度计。另一组用于其他大部分的分光光度计。在打样及生产时，印刷厂必须选择其中一种色标并重复及放置到覆膜及晒版的宽度 (95%以上)。否则，印刷厂将自行承担剩余的胶片及/或印版费用。
