There are two color bars on this proof and in the art file. One to be used with X-rite D50 Spectrophotometer. The other can be used with most other spectrophotometers. Printers must repeat one of the two color bars all the way across the width (grayer edge) of the press sheets on sample runs and production runs. Failure to comply will result in the remaking of film and/or plates at your cost. 数码颜色及设计文件包含了两种色带。一种适用于X-rite (型号D50) 分光光度计。另一种适用于其它大部分的分光光度计。在打样或量出量生产时，印刷厂必须选择其中一种色带并重复添加直到覆盖整张纸的宽度(即口边)。没有按照上述要求而导致输出带缺，输出的费用将由印刷厂承担。
