

Advantage® Respirator Cartridges

The Advantage line of particulate, chemical and combination cartridges is NIOSH-approved (to 42 CFR, Part 84) and provides lightweight, low-profile performance. Cartridges fit both 200 LS Half-Mask and 3000 Full-Facepiece Advantage Respirators.

Advantage® Respirator Cartridges			Acid Gases															
The Advantage line of particulate, chemical and combination cartridges is NIOSH-approved (to 42 CFR, Part 84) and provides lightweight, low-profile performance. Cartridges fit both 200 LS Half-Mask and 3000 Full-Facepiece Advantage Respirators. N95 Snap-On Prefilter and Cover	815394 Pack of 10 816357 Box of 50 815392 Reusable Snap-On Cover 2 in a Package	⚠ WARNING																
R95 Snap-On Prefilter and Cover	815397 Box of 20 815401 Reusable Snap-On Cover 2 in a Package	An appropriate cartridge change-out schedule must be developed by a qualified professional, unless the cartridge/canister utilizes an end-of-service-life indicator. The change-out schedule must take into account all factors that may influence respiratory protection including specific work practices and other conditions unique to the worker's environment. If using against substances having poor warning properties, there is no secondary means of knowing when to replace the cartridges/canister. In such cases, take appropriate additional precautions to prevent overexposure, which may include a more conservative change-out schedule or using an air-supplied respirator or SCBA. Failure to follow this warning can result in serious personal injury or death. As a reference, below is a partial list of substances having poor warning properties:																
Definitions																		
N95-Particulate Filter (95% filter efficiency level) effective against particulate aerosols free of oil; time use restrictions may apply.		Acrolein Hydrogen cyanide Nitric acid Phosphorus trichloride																
R95-Particulate Filter (95% filter efficiency level) effective against all particulate aerosols; time use restrictions may apply.		Aniline Hydrogen selenide Nitro compounds Stibine																
P100-Particulate Filter (99.97% filter efficiency level) effective against all particulate aerosols.		Arsine Methanol Nitrogen oxides Sulfur chloride																
		Bromine Methyl bromide Nitroglycerin Urethane or other diisocyanate-containing paints																
		Carbon monoxide Methyl chloride Nitromethane																
		Diisocyanates Methylene chloride Phosgene Vinyl chloride																
		Dimethyl sulfate Nickel carbonyl Phosphine																
* Escape only.																		
** Effective against, but not NIOSH-approved for Iodine Vapor.																		

Definitions

N95-Particulate Filter (95% filter efficiency level) effective against particulate aerosols free of oil; time use restrictions may apply.

R95-Particulate Filter (95% filter efficiency level) effective against all particulate aerosols; time use restrictions may apply.

P100-Particulate Filter (99.97% filter efficiency level) effective against all particulate aerosols.

* Escape only.

** Effective against, but not NIOSH-approved for Iodine Vapor.

Notes

- Do not use in atmospheres containing less than 19.5 percent oxygen, in atmospheres containing gases or vapors or in atmospheres immediately dangerous to life and health.
- Do not use in atmospheres containing less than 19.5 percent oxygen, or in atmospheres immediately dangerous to life and health.
- Do not wear for protection against organic vapors with poor warning properties or those which generate high heats of reaction with the sorbent material in the cartridge.
- 99.97 percent efficient against 0.3 micron DOP.

Flexi-Filter® Pads for Advantage Respirators

These low-profile, flexible pads fit well under a welding hood and with other personal protective equipment. They offer great balance and weight distribution for maintaining a good face seal, while their swept-back design provides improved vision and comfort.
