Hansco-Mark™ Accessories

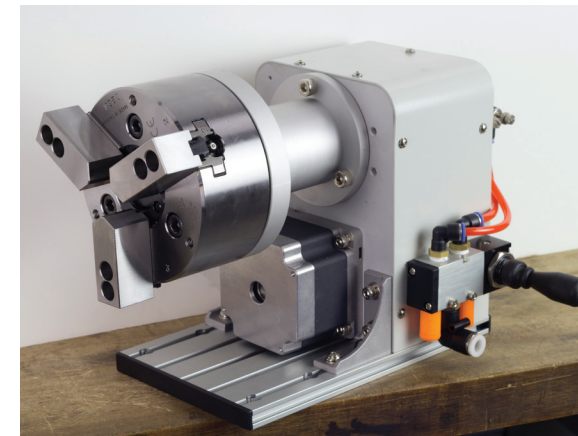

FIXTURE PLATE WITH MAGNETIC CLAMP

Hanson Part No. 20014, Weight - 20 lbs.

The C.H. Hanson Hansco-Mark™ Fixture Plate with Magnetic Clamp is an attachment part for the Micro-Percussion marking machine (Model #MP150i, C.H. Hanson #20000). The fixture plate and magnetic clamp are designed to secure your name plate and tag during the marking operation by; supporting, clamping, and holding the workpiece in place.

#20000 with optional #20010 C-Axis Pneumatic Chuck and #20014 Fixture Plate with Magnetic Clamp

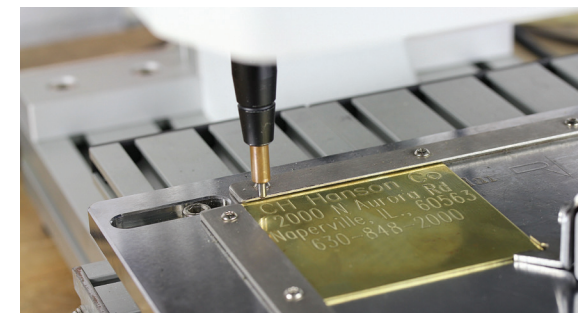

C-AXIS PNEUMATIC CHUCK

Hanson Part No. 20010, Weight - 49 lbs.

- C.H. Hanson Limited Three Year Warranty
- Most secure way to hold rounded objects and parts while marking, bar coding, scribing
- Fits Micro-percussion marking machine (Model #MP150i, C.H. Hanson #20000)
- Most accurate way to mark rounded parts and maintain a consistent cut depth

The C.H. Hanson Hansco-Mark™ C-Axis Pneumatic Chuck is an essential accessory when marking round parts. The C-Axis Pneumatic Chuck fits the Hansco-Mark™ micro-percussion machine (MP150i). When particular applications call for permanent marking of cylinders or round parts, the C-Axis Pneumatic Chuck will securely hold the part you wish to mark using compressed air and simultaneously spin the part as the micro-percussion marks. This precision machined unit allows for accurate and consistent marking depth on rounded objects and parts that would otherwise pose as a challenge to mark properly.

REPLACEMENT ENGRAVING BIT

Hanson Part No. 20012, Weight - 3.3 lbs.

- Oil hardened steel for maximum durability
- Length: 5"
- Fit both Hansco-Mark permanent marking machines (Model #MP5-P and #MP150i)

The C.H. Hanson Hansco-Mark™ Replacement Engraving Bit can be used on either Micro-Percussion marking machine (Model #MP5-P and #MP150i). This bit is produced from quality steel and oil hardened for durability.
