Play Tips from the einstein way

Go All In
Make learning a family affair by exploring together! Detach the 2 toys for seated play. Show baby how to shake the starfish rattle or slide the beads along the bead chaser. Talk about the changes you see and hear. Then ask your baby to try to make these things happen with the toys too! As you explore together, you're helping baby build fine motor skills!

Kick and Splash
Babies love to move! Encourage your baby to kick their legs to make themselves bounce. This is great for body awareness and to help your little mover and shaker learn cause and effect. As baby becomes a toddler, transform the seat into a rocker and encourage them to explore this new movement!

Focus and Sea
Support baby's visual development by using the engaging toy bar to delight tiny eyes! Point out the colorful lights and Opus's engaging smile to encourage baby to focus their eyes on these objects.

Inspiring Vibes
Feel the vibrations! Engage baby during play time with the bouncer's sensory features. Encourage your baby to feel the seat's Taggies, listen to the music, or turn the vibration setting on and off to entertain baby!

There are two color bars on this proof and in the art file. One to be used with X-rite I1 Pro Spectrophotometer. The other can be used with most other spectrophotometers.
Printers must repeat one of the two color bars all the way across the width (gripper edge) of the press sheets on sample runs and production runs. Failure to comply will result in the remaking of film and/or plates at your cost.

数码稿以及设计文件包含了两种色带。一种适用于X-rite（爱色丽）I1 Pro 分光光度计，另一种适用于其它大部分的分光光度计。在打样或者批量生产时，印刷厂必须选择其中一种色带并重复添加直到覆盖整张纸的宽度（叼口边）。没有按照上述要求而导致重新出菲林、出版的费用将由印刷厂承担。
