

Hard Hat Components & Accessories

Each model of Hard Hat is ANSI approved as a complete system. This includes the hard hat shell and suspension as well as other approved components. Components are defined by ANSI/ISEA Z89.1 as: "A functional part of a complete device addressed by the performance requirements of this standard".

Refer to the specific hard hat model for a listing of approved components.

Accessories are defined by ANSI/ISEA Z89.1 as: "A device intended to be mounted on or used with protective helmets". Accessories offered by MSA, when used as intended, will not cause the helmet to fail the requirements of this standard.

Contact Customer Service with any questions.
