Kickstart the Fun
The bottom of baby's foot is rich in nerve endings! Have your baby use their feet during play to stimulate brain development. Encourage them to tap the piano with their feet and then say "You are making music! Do it again!"

Grow What You Know
Discover the colors of the farm! Use the gym's flashcards to introduce your baby to colors. As you flip through the cards, say the name of each color. Repeat this game often and as your baby grows, ask them to name each color!

Mobile Music
Take the show on the road! Detach the piano toy to let your toddler take it out and about to play. Lightweight and mobile, the piano is a great way to explore music and cause-and-effect on the go!

Clever Word Play
It's never too early to introduce language learning! A baby's brain is great at processing sounds from different languages. To help them learn, set the piano to Discovery Mode so baby can hear numbers, colors and animal names in 4 languages as the corresponding colors light up!

	Black

There are two color bars on this proof and in the art file. One to be used with X-rite I1 Pro Spectrophotometer. The other can be used with most other spectrophotometers. Printers must repeat one of the two color bars all the way across the width (gripper edge) of the press sheets on sample runs and production runs. Failure to comply will result in the remaking of film and/or plates at your cost. 数码稿以及设计文件包含了两种色带。一种适用于X-rite (爱色丽) I1 Pro 分光光度计, 另一种适用于其它大部分的分光光度计。在打样或者批量生产时, 印刷厂必须选择其中一种色带并重复添加直到覆盖整张纸的宽度(叼口边)。没有按照上述要求而导致重新出菲林、出版的费用将由印刷厂承担。
