	Missing		
Unauthorized Modification			

MSA Inspection Requirements

This inspection log can be used as a guide for pre-use User inspections but is not a replacement for the Instruction Manual. For additional warnings and product details, reference the Instructional Manual. The User must inspect the anchorage connector extension before each use. All anchorage connector extension products must be formally inspected by a competent person prior to first use. MSA requires that all anchorage connector extension products be inspected by a competent person other than the user at intervals of no more than one year per applicable standard or as specified by a formal fall protection program. The interval will be dictated by the usage, local regulations, and environmental conditions, and will be at least annually. Record formal inspections in the Inspection Log. Indelibly mark the inspection grid attached to the anchorage connector extension product. Do not use an anchorage connector extension product with a formal inspection date older than one (1) year unless under provision of formal inspection program.
