

Why Is SOD Sourced From French Melons?

Our SOD comes from a natural, non-GMO melon (Cucumis melo L.) grown exclusively in the south of France. Compared to traditional cantaloupes, these melons last weeks longer without signs of decay, due to their high levels of SOD.

So Step Forward With Us

A History Of Discovery

Trained as a pharmacist in the 1920s, Dr. Eugene Schiff's quest to find natural sources of nutrients led to the birth of Schiff Bio-Foods.

For A Better & Healthier Future

We Care

At Schiff, we value Earth's powerful resources and their potential to support health and wellbeing. So, we are conscious about using them as responsibly as possible. We want to be honest and transparent with our customers about how we are tracking on our sustainability missions.

Time-Tested Quality Commitment

At Schiff we are relentlessly searching for new sources of nutrients. Though we aim to deliver the latest discoveries, our time-tested commitment to safety and quality backs all our innovation.

Helps Reduce Feelings of Stress and Occasional Fatigue*¹

SOD (also known as Superoxide Dismutase) is one of the main enzymes naturally present as part of the body's antioxidant defenses. Harmful environmental factors can induce the creation of free radicals, which can cause oxidative stress. Antioxidants can help reduce oxidative stress and defend against cell damage.

Naturally Sourced Ingredient

At Schiff we are passionate about discovering new sources of nutrients and ingredients. Our SOD is sourced from French Melons that are grown exclusively in the south of France.

* These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

1. Based on an 84-day, randomized, double-blind, placebo-controlled clinical study, measuring the impact of a proprietary coated freeze-dried melon juice concentrate (Extramel®) vs. placebo on perceived stress and perceived physical fatigue. (Carillon J. et al., Nutrients, 2014.)

Quality Commitment

Over 80 years later, Eugene's legacy lives on as our time tested commitment to quality backs all our innovation.

We guarantee all of our products' freshness, purity, and labeled potency.

About Our Ingredient

These Antioxidant Defense With SOD capsules are Non-GMO & Gluten-Free, and have no Artificial Flavors.

Sustainable Packaging

Our first step was to look for more sustainable pack sources, and so our cartons are made from post-consumer recycled natural kraft paper. They are 100% recyclable and 100% compostable.

Recycle With TerraCycle®

We are taking great strides to ensure our Schiff packaging has the smallest environmental footprint possible, however we are not there yet with our bottles. So, we've partnered with TerraCycle® to make it easier than ever to recycle them, or we encourage you to find creative ways to reuse them!

Nearly everything we touch can be recycled. TerraCycle takes hard-to-recycle materials and turns them into new products.

How can I participate? Start collecting any of your health packaging waste (i.e. vitamins and supplements, cold medication) in your home, school or office. Visit TerraCycle's website, sign up for the Schiff Recycling Program and download free shipping labels. Send them your waste to be recycled!
