

HIGH-PERFORMANCE SUPPORT FOR HARDWORKING HORSES

Optimum blend of natural ingredients to enhance the body's normal repair of connective tissue and joints

Protection against free radical damage

Support for GI tract health while guarding against gastric distress

Support for muscle recovery

Helps decrease normal inflammatory pathways

Introducing Bute-Less® Performance Comfort & Recovery Support

New Bute-Less® Performance pellets are designed to provide comprehensive support for managing occasional stiffness, soreness, and discomfort associated with training and competition. An optimum blend of natural ingredients may help to:

- Relieve inflammation associated with training and competition
- Support GI tract health and recovery from gastric distress
- Support muscle recovery
- Protect against free radical damage
- Does not contain any substances currently prohibited by USEF or FEI

optimized curcumin

65x more bioavailable than unformulated curcumin

SHOW-SAFE FORMULA

Harnessing the power of Longvida® SD optimized curcumin

When we were developing Bute-Less® Performance pellets, we knew that we wanted them to feature curcumin, a powerful, natural antioxidant that's found in the spice turmeric. But we didn't want to use just any curcumin. We chose Longvida®, a breakthrough formula developed by Verdure Sciences and an elite group of UCLA neuroscientists. Clinical data consistent with human bioavailability showed that Longvida® is at least 65 times more bioavailable than unformulated curcumin*. The Longvida® SD optimized curcumin extract found in Bute-Less® Performance pellets delivers free curcumin that provides hardworking horses inflammation-support, muscle-recovery, and digestive benefits.*

FACT

Because the key factor is the amount of curcumin absorbed, not consumed, high dosings of curcumin are no longer necessary.

Cutting-edge SLCP™ Technology, or Solid Lipid Curcumin Particle Technology, is responsible for the “magic” of Longvida®. SLCP™ Technology is an ideal absorption-promoting system. It not only helps preserve and protect curcumin from the harsh environment of the stomach, it also helps deliver the free form of curcumin into the bloodstream and target tissues. And because the key factor is the amount of curcumin absorbed, not consumed, high dosings of curcumin are no longer necessary.*

Optimized curcumin is just the beginning.

Beyond curcumin, Bute-Less® Performance utilizes a range of other powerful active ingredients:

- Boswellia helps decrease normal inflammatory pathways
- Yucca enhances the body's normal repair of connective tissue and joints
- MSM supports cellular health and reduces the negative effects of oxidative stress

BUTE-LESS® PERFORMANCE **ITEM # 430470** **UPC # 0 11444 52501 1** **CASE PACK: 4**
