

# OPTIMIZE YOUR JOINT CARE WITH **FLEX+MAX<sup>®</sup>**

MSM and flaxseed provide support for normal cellular function within joints and help ease discomfort

Fenugreek delivers an irresistible flavor that guarantees palatability

**5x**  
**SMALLER**

**FOR EASIER ABSORPTION**

The low molecular weight chondroitin molecule in Flex+Max<sup>®</sup> is five times smaller than the chondroitin sulfate used in many other joint supplements, enhancing bioavailability to the joint cartilage.

Guaranteed levels of chondroitin sulfate and glucosamine, along with hyaluronic acid, promote cartilage development and joint health

Rice bran and a special low molecular weight chondroitin ensure that active ingredients are delivered to joints at maximum levels

Boswellia helps decrease normal inflammatory pathways

**FLEX+MAX<sup>®</sup> JOINT HEALTH SUPPLEMENT** offers comprehensive joint care featuring enhanced ingredient levels—the optimum amounts recommended by experts—for guaranteed results. All in a highly palatable formula with no fillers.

# Maximizing key ingredients to deliver maximized results.

PRODUCT	FORM	SERVING SIZE FOR MAINTENANCE	COST/DAY	GLUCOSAMINE	CHONDROITIN SULFATE	HYALURONIC ACID (HA)	MSM	LOADING DOSE	NASC SEAL	ALSO CONTAINS

\*Utilizes Sodium Hyaluronate

Whether it's the "guaranteed levels of glucosamine and chondroitin," or the optimum levels of other key joint and connective tissue-supporting ingredients in Flex+Max®, it's important to compare levels of those ingredients when choosing a joint supplement. The amount of active ingredients in supplements can vary wildly, which will drastically affect the results you see. You'll also find that the high levels of active ingredients in Flex+Max®, as well as its serving size and lack of need for a loading dose, make it a fantastic value.
