Under-The-Sea Sustainability

Eco-Friendly. Krill is one of earth's most sustainable organisms. MegaRed goes a step further by only sourcing krill from the Antarctic where krill is most abundant.

This product comes from a fishery that has been independently certified to the MSC's standard for a well-managed and sustainable fishery.

Frequently Asked Questions

What are Omega-3 fatty acids, EPA and DHA?
EPA and DHA are two different types of Omega-3s. Omega-3s are critical to human health and provide the building blocks for all your cells.

What is Krill?
Krill are tiny crustaceans that carry their Omega-3s in phospholipid form which helps absorption in the human body.

What are Antioxidants?
Antioxidants, often found in fruits and vegetables, support general health and wellness by neutralizing free radicals that can harm your body's cells.* Marigold Flower Extract contains antioxidants lutein and zeaxanthin.

When Will the Product Expire?
On the bottom panel of the carton and right-side panel of the label you will see "EXP". The date printed there indicates when the product expires.
