

Sterile Breast Pump Sets

Empowering Healthcare Professionals and Parents to Achieve Their Breastfeeding Goals

ONLY Symphony® PLUS™ with exclusive Initiation Technology™

- ✓ **Doubles the number** of mothers who 'Come to Volume.'^{1,2,3}
- ✓ Up to **50% increase** in milk supply¹

The Symphony Difference: Backed by Clinical Evidence

- 8 RCTs
- 1 Non-randomized controlled study (NRCT)
- 2 Cohort studies

The most studied hospital-grade breast pump available.

Medela's sterile breast pump sets (kits), when used with the Symphony PLUS® breast pump, support the three stages of milk production: **Activate, Build, and Maintain.**

Support Through Every Stage of the Lactation Journey

Symphony & Harmony® Breast Milk Initiation Kit (#67355S/101029005)

Unmatched solution designed to optimize pumping right after birth, seamlessly connecting with the Symphony Breast pump. It has the unique capability to support the activation of milk cells and protect colostrum from loss and contamination. Includes a Harmony handle for manual pumping.

Symphony Breast Milk Initiation Kit (#67350S/101029013**)

Designed to optimize pumping right after birth and to seamlessly connect with the Symphony Breast pump. It has the unique capability to support the activation of milk cells and protect colostrum from loss and contamination.

Breast Pump Kit with Harmony & 80mL container (#101046447)

Optimized for the build stage, the 35mL and 80mL containers are tailored for collecting initial milk volumes following secretory activation—silicone tubing offering to align with the hospital's green initiatives and includes a Harmony handle for manual pumping.

Pediatric Breast Pump Kit with Harmony (#101046362)

Perfect for patients with an established milk supply; it provides everything to pump with the Symphony breast pump and includes a Harmony handle for manual pumping. The Harmony has a unique ergonomic handle designed with the 2-Phase Expression® technology.

Which kit for is right for your facility?

Supporting patients throughout their lactation journey!	Symphony & Harmony BMI Kit 67355S	Symphony BMI Kit 67350S	Breast Pump Kit with Harmony & 80mL 101046447	Pediatric Breast Pump Kit with Harmony 101046362
Colostrum Collection: Supports activation of milk cells and protects colostrum from loss and contamination.				
Manual Pumping: Harmony handle for manual pumping, which ensures patients go home with a pump.				
Breast Shield Optimization: Critical for effective milk removal, range of two tunnel sizes (21 and 24 mm) offered for optimal fit in one kit.				
Established Lactation: Larger container size for pediatrics or patients with an established milk supply.				
Silicone Tubing: Green alternatives to PVC tubing for hospitals.				

Did You Know?

Research has shown that on average, double pumping obtains 18% more milk compared to single pumping.²

- Sterile and ready-to-use
- Not made with BPA, DEHP, or Natural Rubber Latex
- Designed for use with Symphony® and Symphony PLUS Breast Pump
- All parts that come into contact with Breast Milk are not made with PVC.

Content appearance may vary.

* Medela is enhancing our most popular sterile breast pump kits by removing the 80 mL container and replacing it with the Colostrum Protector. This change will be a flow-through conversion and will begin shipping from Medela in February 2025; however, time will vary pending on inventory levels at your facility and distributor locations.

**Please note that the connector found in 101044744, 101029013 (67350S), and 101042764 only works with Symphony and will not work with the Harmony handle.
