Why Are The Softgels Red?

Antarctic krill is rich in the natural antioxidant astaxanthin and is where these softgels get their deep red color.

What are Krill?

Krill are tiny crustaceans that thrive in the frigid waters of the Antarctic. Krill oil carries its Omega-3 in a phospholipid form which helps absorption in the human body*

Why Fish and Krill Oil?

Get the best of both worlds with two times more Omega-3s vs. standard fish oil alone. Unlike fish oil, the omega-3 fatty acids in MegaRed Omega-3 Krill Oil are mainly absorbed and carried to the body's cells in phospholipid form.

When Will The Product Expire?

On the bottom panel of the carton and right-side panel of the label you will see "EXP". The date printed there indicates when the product expires.
