### 5.1. Suitable (and unsuitable) extinguishing media

- Suitable extinguishing media : Use dry chemical, CO<sub>2</sub>, water spray or alcohol-resistant foam.  
 Unsuitable extinguishing media : Do not use a water jet since it may cause the fire to spread.

### 5.2. Specific hazards arising from the chemical

- Fire hazard : Flammable liquid and vapor. Vapors are heavier than air and may travel considerable distance to an ignition source and flash back to source of vapors.  
 Explosion hazard : Heat may build pressure, rupturing closed containers, spreading fire and increasing risk of burns and injuries.  
 Hazardous decomposition products in case of fire : On combustion, forms: carbon oxides (CO and CO<sub>2</sub>). Nitrogen oxides. Sulfur oxides (SO<sub>x</sub>).

### 5.3. Special protective equipment and precautions for fire-fighters

- Firefighting instructions : In case of fire: Stop leak if safe to do so. Cool down the containers exposed to heat with a water spray. Do not allow run-off from firefighting to enter drains or water courses.  
 Protection during firefighting : Do not attempt to take action without suitable protective equipment. Use self-contained breathing apparatus and chemically protective clothing.

## SECTION 6 Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

- General measures : Eliminate ignition sources. Ventilate area. Avoid contact with eyes, skin and clothing. Do not touch or walk on the spilled product. Keep unnecessary and unprotected personnel away from the spillage.

#### For non-emergency personnel

- Emergency procedures : No open flames, no sparks, and no smoking. Ventilate spillage area. Avoid breathing mist, vapors. Avoid contact with skin and eyes.

#### For emergency responders

- Protective equipment : Do not attempt to take action without suitable protective equipment. For further information refer to section 8: "Exposure controls/personal protection".

- Environmental precautions : Avoid release to the environment. Prevent liquid from entering sewers, watercourses, underground or low areas. Collect spillage. Notify authorities if product enters sewers or public waters.

### 6.2. Methods and materials for containment and cleaning up

- For containment : Stop leak, if possible without risk. Collect spillage.  
 Methods for cleaning up : Absorb and/or contain spill with inert material, then place in suitable container. Use non-sparking tools. Wash contaminated area with large amounts of water. Use personal protective equipment as required.  
 Other information : Dispose of materials or solid residues at an authorized site.

For further information refer to section 8: "Exposure controls/personal protection". For further information refer to section 13.

**15.1. Federal regulations**

All components of this product are listed, or excluded from listing, on the United States Environmental Protection Agency Toxic Substances Control Act (TSCA) inventory.

This product or mixture is not known to contain a toxic chemical or chemicals in excess of the applicable de minimis concentration as specified in 40 CFR §372.38(a) subject to the reporting requirements of section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372.

**FIFRA Labelling**

EPA Registration Number	53883-150-1543
This chemical is a pesticide product registered by the Environmental Protection Agency and is subject to certain labeling requirements under federal pesticide law. These requirements differ from the classification criteria and hazard information required for safety data sheets, and for workplace labels of non-pesticide chemicals. Following is the hazard information as required on the pesticide label.	
FIFRA Signal Word	Caution
FIFRA Precautionary Statement	Keep out of reach of children. Hazards to Humans and Domestic Animals.
FIFRA Human Health Hazards	Harmful if swallowed. Avoid contact with eyes, skin, or clothing. Avoid contamination of food. Wash hands with soap and water after use.
FIFRA Environmental Hazards	This product is extremely toxic to fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.
