Did you know?

**Flies drink 4 cups
of your horse's
blood every 10 days.***

And that's not including blood loss
from ticks and mosquitoes.

UltraShield® EX kills & repels more than 70 Species

*Townsend L. Horse flies and deer flies. University of Kentucky ENTFACT-511.

Flys-X®

Multi-species fly spray ideal for the fly control needs of hobby farmers

- For use on horses, foals, cattle, pigs, goats, sheep, donkeys, llamas, poultry, and dogs
- Kills horn flies, houseflies, face flies, mosquitoes, gnats, and blood-sucking lice
- Kills fleas and brown dog ticks on dogs and on premises
- Water-based formula

Available in:

32 oz. Spray

1 Gallon Bottle

The Importance of the Ingredient Panel

- Refer to the Active Ingredient panel on the front of the bottles to identify the differences between formulas.
- Small differences in ingredient inclusion rates mean big differences between formulas.
- Rotating formulas with different ingredients can help boost efficacy against the different species that appear as the season progresses.

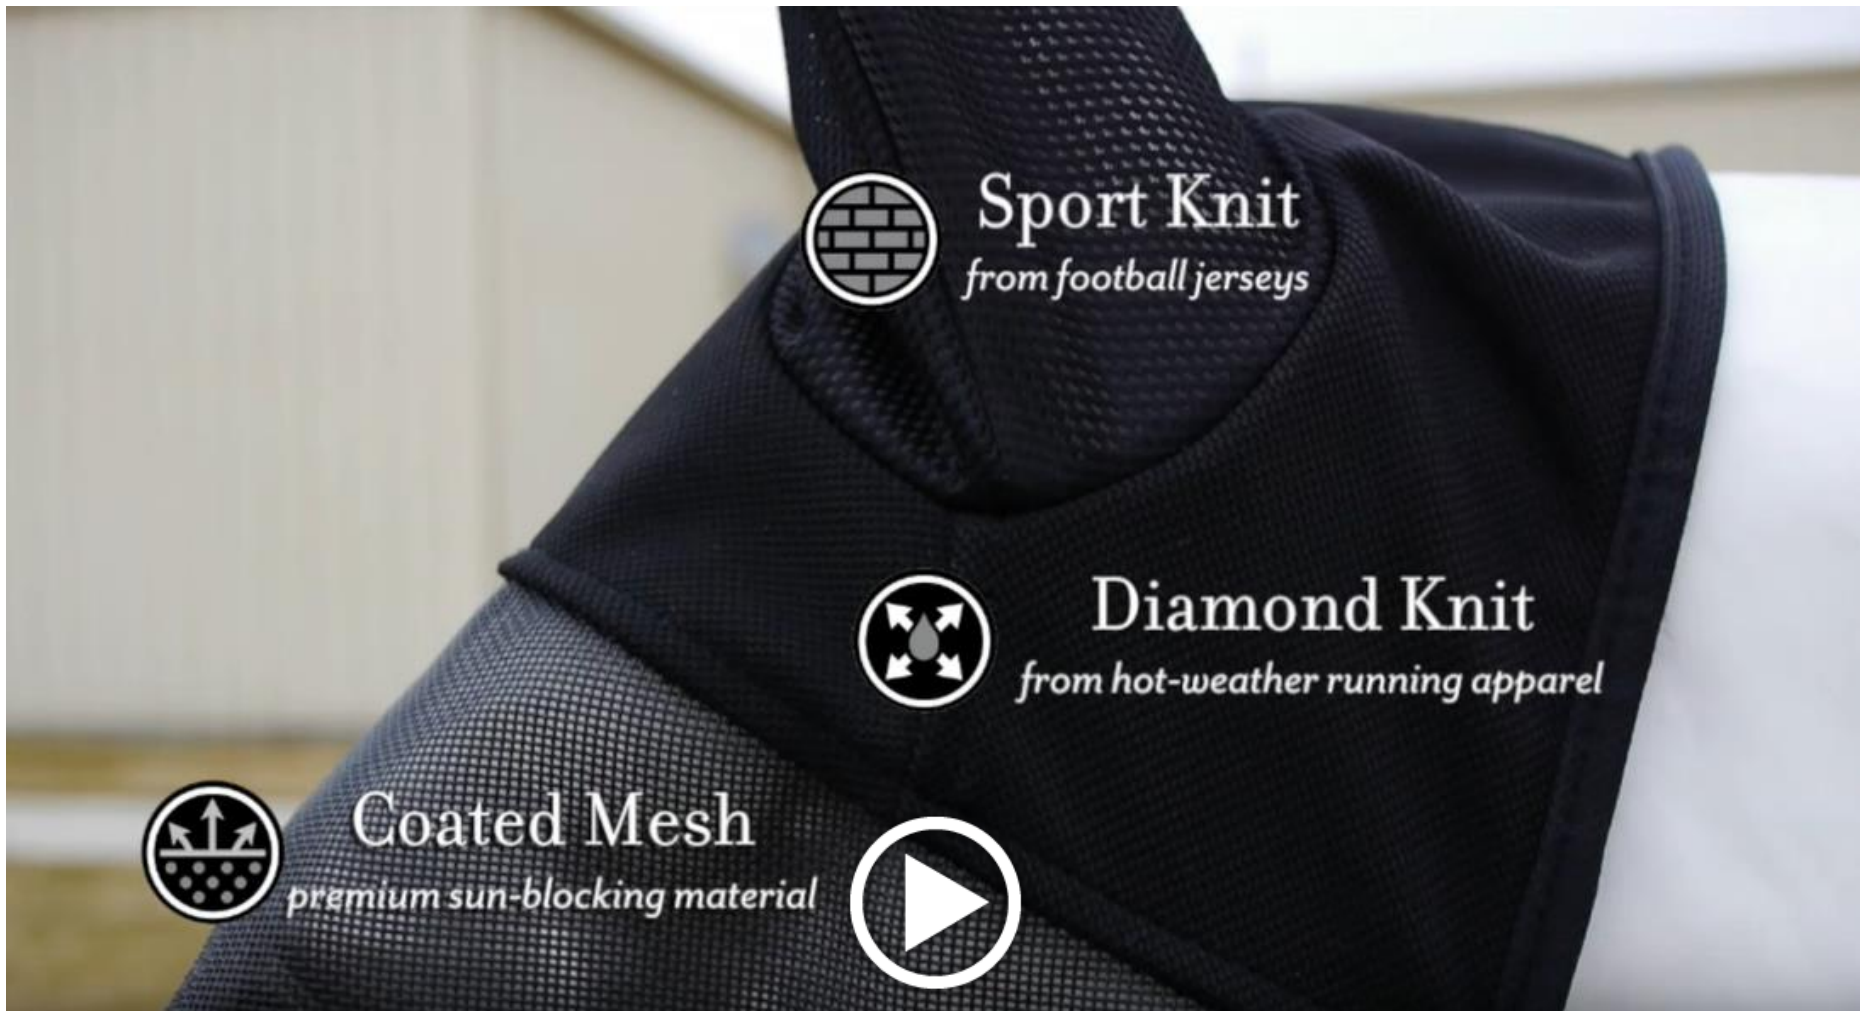

UltraShield® Fly Masks

The new standard for protection and comfort

- Keeps horses cool, dry, and comfortable
- Uses high-tech fabrics originally developed for human performance clothing
- Blocks 80% of harmful UV rays and reduces glare – *highest on the market!*
- Dark color reduces glare, increases horse's ability to see through it
- Crown and jowl fabric wick moisture to keep horses cool and dry
- All seams are rolled and stitched so there are no exposed edges
Helps prevent rubs and irritation to keep horses comfortable
- Removable nose option
