

ELECTRONIC TAPPING ARMS

Palmgren's line of Electronic Tapping Arms are suitable for any applications using small, medium or large tap sizes. Using a standard 110V plug and mounted on the included worktable with 4 heavy-duty casters, these arms can be used anywhere in shops of any size. With their simple design and countless features, these machines are the perfect time saving solution to all your hole tapping needs.

- Height adjusting leadscrew allows for tall and short parts
- Arm can spin 360° around the table mount
- Easy to use, touch screen control panel
- Control system can be run in either Metric or Imperial
- Automatic Tapping function with automatic tap reversal
- Depth setting for tapping blind holes
- Uses quick change size 1 tap holders
- Includes horizontal head attachment for horizontal hole tapping
- Includes worktable with t-slotted cast iron top

Item #	Motor Voltage	Motor Power	Motor RPM	Working Radius	Overall Weight Including Worktable
