Natural Ingredients Proven Through Science

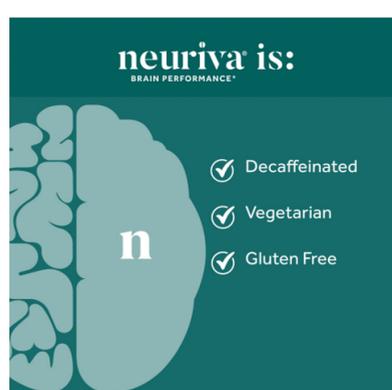

Coffee Cherry

OK, first things first, our secret ingredient isn't coffee. It's a botanical extract derived from the coffee cherry - the skin and rind of the hand-picked fruit. This extract is GMO-free, decaffeinated, and it's been shown to have incredible brain-supporting properties. We call it Neurofactor. We've studied this amazing superfruit and proven that it elevates the body's levels of the neuroprotein BDNF. BDNF is a vital neuroprotein that is known to strengthen connections between brain cells and help new connections flourish.*

Sharp PS Green™

Your 100% awesome brain is about 60% lipids. Lipids are a key component of the body's cells overall. Phospholipids, a class of lipids, are especially crucial to the health of both cell membranes and neurotransmitters. Phosphatidylserine (PS) is a type of phospholipid found in the human brain and is vital for cognitive function. Dietary trends show that PS intake from food and diet alone has declined over the years so PS supplementation is a great way to help support your brain and cognitive function!

Nature Made It. Science Proved It. Brains Love It.

You know that feeling when your brain kicks in? There's a palpable rush, a sense of pride, a feeling of elation - you nailed it! That's the feeling we live for at Neuriva. Our naturally sourced ingredients are decaffeinated, GMO-free, gluten-free, and clinically proven to support brain performance.* #Brain Better
