Care and use

To ensure the proper use of the Overdoor Ironing Board and protect your door from damage, it is essential to apply the four adhesive pads to the hooks prior to attachment. The placement of the pads should correspond to the dimensions of your door, and they can be trimmed for a perfect fit if necessary. After securing the hooks to the door, ensure the door is closed. Next, link the ironing board to the hooks, confirming that it is securely attached. To deploy the ironing board, hold it firmly, unclipping the locking mechanism, and gently lower it to a horizontal position. For storage, raise the board back to the vertical position while gripping it, and re-engage the locking mechanism. It is advisable to remove the hooks and ironing board when not in use. Exercise caution by ensuring the door is completely closed before attaching the board; if the door does not close fully with the hooks in place, discontinue use. Additionally, refrain from allowing the door to swing open or closed during ironing and avoid using the board on any door that cannot be secured. Do not apply excessive pressure while ironing, and never leave a hot iron unattended or face down on the cover. Please remember that this product is not a toy and should be kept out of the reach of children. For care of the ironing board cover, do not bleach, tumble-dry, or dry-clean; you may iron up to a maximum temperature of 200 °C, and light soiling can be addressed by wiping the cover with a soft, damp cloth. Prior to first use, it is recommended to run a hot steam iron over the cover to eliminate any creases.
