

IMPRESSION TRAYS

ITEM 2220-2239

Dynarex Impression Trays are disposable, perforated trays designed to securely hold and support dental impression materials during molding. Engineered to provide form-consistent impressions, these trays are available in multiple sizes to accommodate a wide range of patients. The smooth edges help improve patient comfort, while the single-use design supports optimal hygiene.

- Designed to securely hold and support dental impression materials during molding
- Engineered to provide dependable, consistent impressions for optimal reliability
- Features smooth edges for improved patient comfort
- Single use and disposable for optimal hygiene
- Upper and lower trays available in multiple sizes; and in quadrant and anterior forms
- Not made with natural rubber latex
