

PowerPanel Personal Linux v1.4.2 Release Note

New Feature

- Includes support for new OS versions, including Red Hat Enterprise 10, Ubuntu 24.04 LTS, Debian 13, and CentOS Stream 10.

Feature Improvements

- PowerPanel Cloud functionality was optimized to improve operation.
- Security enhancements were made to ensure protected operation.

Fixes

- An issue with a blank SN in the previous version has been corrected.
- Correct an error where there was a continuous re-login in PowerPanel Cloud.
- Updated to resolve issues associated with shutdown related functionality.
- Other minor updates were completed.
