# STENCILS

# DIRECT CONTROL PROTECT

# LETTERS, SYMBOLS, MATERIALS

You probably never take notice of the markings on every parking lot, every street intersection, shipping crates and factory floors. Very simply, stencils are used more often than you might imagine. And we know the stencil industry very well since we've been manufacturing them since 1866!

Our line of products range from small 1/2" brass stencils all the way up to 39" x 48" handicap stencils.

And if you have a special request or custom need, we can produce that for you too. C.H. Hanson® has a product to fit your need. Contact us today for a solution.
