

A bright, modern dining room with white walls and crown molding. On the left, a white kitchen island with a marble countertop has two black-framed pendant lights with white cylindrical shades hanging over it. Two wicker bar stools with black metal legs are tucked under the island. In the background, a large window with white trim looks out onto greenery. To the right, a dark wood dining table is set with a teal tablecloth, glassware, and a green pitcher. A black-framed pendant light with multiple small bulbs hangs over the table. Four wicker chairs with black metal legs are around the table. A large potted plant sits on the wall between the island and the dining table. The floor is made of light-colored wood, and a teal patterned rug is partially visible in the foreground.

Lighting Packages Quick Guide

The Lighting Packages Quick Guide

Browse our popular lighting packages “at-a-glance,” utilizing it as a reference to our extensive line of products. With a passion for beauty, value and selection, Progress Lighting is dedicated to elevating the quality of life through lighting. For over 100 years, Progress Lighting has been committed to helping builders meet the needs and wants of homeowners. Focused on creating high-performance fixtures that not only reflect the personalities of homeowners but also enhance their lifestyles, Progress Lighting offers affordable luxury lighting.

Icon Index

Featured products by Progress Lighting Design Series™

DURASHIELD products are built with high performance materials that hold up in harsh weather conditions to resist rust, corrosion and fading.

Products with this icon are Dark Sky Friendly; these designs minimize glare and up light to prevent light pollution.

Products referencing this logo meet the energy efficiency requirements for light fixtures set forth in ENERGY STAR® product specifications. Please refer to energystar.gov for specific product qualifications and list of certified products.

Damp Location products and fixtures can be used in covered spaces outdoors or indoors.

If the product will have direct contact with water, you'll need to ensure that the product has a “wet” listing. Products rated for damp or wet locations are designed with features specifically for this type of environment. Wet location products may also be used indoors.

Please note indoor only (dry location) products should only be used indoors. Even if an outdoor area or screened-in porch is covered, the fixture can be affected when exposed to humidity. You can, however, “bring the outdoors inside” – as using outdoor products are perfectly acceptable to use in interior spaces.

The products with this logo have passed the cUL requirements and are available for sale in Canada. These products include the additional safety features needed to comply with the regulations in Canada. Items with the icon are listed with NRCan.

Featuring Vertex and Parkhurst
