CyberPower

RMCARD100 Remote Management Card

Allows remote monitoring and control of a UPS on a network.

The CyberPower RMCARD100 is a full-featured network UPS management device that remotely manages, monitors, and controls your CyberPower UPS products. It is an external adapter that allows remote monitoring and control of a UPS via Web Browser or NMS. By utilizing the auto-shutdown software, servers and workstations stay protected from data loss due to power failure. Event log in software traces history of the UPS operational history. Security management also provided.

A Three-Year Warranty ensures that this network management card has passed our highest quality standards in design, assembly, material and workmanship.

Features

- Remote management and configuration of UPS via Web Browsers or NMS
- Supports TCP/IP, UDP, SNMP, HTTP protocols
- Automatic events notification via SNMP Traps
- Flexible Event Action setting
- Auto-shutdown to protect servers and workstations from data loss due to power failure
- Schedule shutdown/startup/reboot of UPS remotely
- Event logging to trace UPS operation history
- SNMP MIB provided
- 10Mbps Ethernet compatible
- Quick installation and friendly user interface

RMCARD100 Remote Management Card

Allows remote monitoring and control of a UPS on a network.
