

FAMILIA TORRES

2021 PIRENE, DO CATALUNYA

WINERY

Familia Torres founded its first winery in Vilafranca del Penedès in 1870, over 150 years ago, but its roots in the winegrowing traditions of Spain date back to the 16th century. Five generations have carried the family business forward, passing on their passion for wine culture from parents to children — a passion steeped in respect for land and tradition, and a firm belief in innovation. Today the family focuses on wines from unique vineyards and historical estates, as well as the recovery of ancestral varieties.

WINE

Since the 1980's, Familia Torres has been recovering ancestral varieties to restore Catalonia's viticultural heritage and combat climate change. Today, the fifth generation of the Torres family are firm proponents of this project, with the ambition of making unique, exciting wines based on forgotten varieties. Of the more than 50 varieties recovered so far, six have proved extremely promising. The winery has found that some of these varieties, like Pirene from Penedès, not only have great potential for winemaking but are also highly resistant to high temperatures and drought. Pirene is a fresh, elegant red variety that is grown to make this single variety wine in very limited production.

VINEYARDS

Pirene was first discovered by the Torres family in 2006 and following studies and analysis, they planted an experimental vineyard to Pirene from 2014-2019. The Pirene vineyard, called Sant Miquel de Tremp vineyard, is located in the foothills of the Catalan Pyrenees at the highest altitudes for

vineyards in the province of Lleida (950 m). With calcareous soils that are well-draining and highly permeable, this area is characterized by its pronounced continental climate, with marked temperature variation, conditions that make it possible to maintain freshness and balance in the wine.

VINTAGE NOTES

The 2021 vintage was a relatively dry year, but a significant amount of snow at the beginning of the year allowed the vines to develop correctly during the growth season. This fact, along with sporadic precipitation during the rest of the season, contributed to the normal development of the vines.

In terms of temperature, the lows were lower than usual throughout much of the year, but the highs were significantly higher than normal, with a heat wave at the end of August coinciding with the beginning of the harvest.

WINEMAKING

In stainless steel tanks and malolactic fermentation in barrels (50%) and in stainless steel (50%).

TASTING NOTES

Pirene is a deeply pigmented red variety with high tannin levels, lots of red fruit, and a spicy, mineral nuance. The elegant palate reveals surprising texture and finesse, full of flavourful yet fresh fruit.

VINEYARD

Region:	Catalunya
Appellation:	Catalunya
Soil:	Calcareous clay
Age/Exposure:	Planted from 2014-2019 830-940 metres above sea level
Vineyard Size:	8.7 ha
Vine Density:	1,432 Kg/ha
Eco-Practices:	Sustainable; Solar; Regeneratively farmed

WINEMAKING

Varietals:	Pirene
Aging:	80% of the wine is aged in second-fill barrels and stainless steel for 4 months. The other 20% is aged in second-fill French oak foudres.

TECHNICAL DETAIL

Alcohol:	14%
Residual Sugar:	0.6 g/L
Total Acidity:	6.74 g/L
pH:	3.44
