

SENIOR CONSULT STAGE 2 HIGH CAL.

Available in 400g,
1.5kg and
3.5kg bag

- Formulated for cats with obvious signs of ageing. Contains an antioxidant complex (vitamin C, vitamin E, lutein, taurine) and lycopene to help balance oxidative stress. Helps maintain kidney function with a low phosphorus content. Helps maintain cats' mobility with chondroitin and glucosamine plus Green Lipped Mussel extract. Provides selected proteins with branched chain amino acids (for ageing muscle mass). Enriched in brain-supporting phosphatidylserine with an adapted L-tryptophan ratio.

- Ageing cats may have decreased fat assimilation capacities and increasing energy requirements. A high fat content facilitates a higher energy intake. Designed for ageing cats with a body condition score lower than or equal to 5/9.

Approximate size

KEY VALUES

per 100 g
as fed

Protein	28g
Fat content	18g
Crude ash	5.8g
Carbohydrate	31.1g
Dietary fibre	11.6g
Omega 6	4.46g
Omega 3	1.37g
EPA+DHA	0.77g
Calcium	0.74g
Phosphorus	0.55g
Sodium	0.4g
Linoleic acid	4.23g
Chondroitin+glucosamine	100mg
Metabolisable energy**	401.6kcal

COMPOSITION

Maize, wheat gluten*, animal fats, dehydrated poultry protein, maize flour, wheat, maize gluten, rice, hydrolysed animal proteins, vegetable fibres, chicory pulp, fish oil, soya oil, minerals, tomato (source of lycopene), psyllium husks and seeds, Fructo-Oligo-Saccharides (FOS), New Zealand green-lipped mussel extract (GLM 0.3%), hydrolysed yeast (source of Mannan-Oligo-Saccharides), hydrolysed crustaceans (source of glucosamine), borage oil, marigold extract (source of lutein), hydrolysed cartilage (source of chondroitin).

Additives (kg) * * *

Nutritional additives:

Vitamin A: 20600IU, Vitamin D3: 7000IU, E1 (Iron): 51mg, E2 (Iodine): 5.1mg, E4 (Copper): 9 mg, E5 (Manganese): 66mg, E6 (Zinc): 198mg, E8 (Selenium): 0.1mg.
Preservatives - Antioxidants.

FURTHER INFORMATION

Age-related **Sarcopaenia** occurs in a cyclical manner; loss of muscle mass leads to musculoskeletal weakness. A loss of strength impacts on physical activity which leads to amyotrophy and fibrosis.

Sarcopaenia in older cats leads to progressive replacement of muscle fibres with fat.

*L.I.P. (Low Indigestible Protein): protein selected because of its very high assimilation

**Calculated according to NRC2006

***NOTE: Values reflect only levels added to the formula, not those naturally occurring in components of the diet. For total levels in the diet, refer to the Average Analysis pages
