BioAdvanced Science-Based Solutions Fruit & Vegetable 3-in-1 Solution Concentrate

EPA Reg. No. 67702-17-92564

This recommendation is made as permitted by Section 2(ee) of FIFRA, as amended, and has not been submitted to or approved by the US Environmental Protection Agency. This recommendation must be in the possession of the user at the time of pesticide application.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For control of Spotted Lanternfly on vegetables, strawberry, bushberry, caneberry and grapes: measure the area to be treated. Determine how much spray solution to make up. Evenly apply the prepared mixture to the base of all plants within the 10 sq ft. of area and not just to the base of one plant in the treatment area. For fruit and nut trees: measure the distance from the tree trunk to the drip line, and round down to the nearest foot. Consult the tree rate chart to determine the number of ounces of product to use. Add specified amount of product to 1 gallon of water. Pour the mixture at the base of the tree. Fill the bucket with an additional gallon of water and pour at the base of the tree.

Follow all other label directions, restrictions and precautions on the product label.

ALWAYS READ AND FOLLOW LABEL INSTRUCTIONS

This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and observe the precautionary statements plus all other information appearing on the product labels. For Utah and Washington, this recommendation is not required to be in the possession of the user at the time of pesticide application. For all other states, this recommendation must be in the possession of the user at the time of pesticide application.

This Technical Information Bulletin expires on 12/31/2024.
