Laundry San 80 HIL0304906

Laundry San 80 is an ultra-concentrated liquid fabric sanitizer designed for commercial machines, tunnel washers and home style machines. Used in the final rinse, Laundry San 80 eliminates 99.9% of infectious bacteria and leaves behind a finish on laundered textiles that is bacteriostatic. Unlike bleach, which stops working after textiles are removed from the wash-wheel, Laundry San 80 remains active on textile surfaces, continuing to aid in the prevention of cross-contamination from both Gram Negative and Gram Positive bacteria. Use only as directed.

Features & Benefits

EPA Registered Laundry Sanitizer.

Residual Bacteriostatic.

Ultra-concentrated Formulation.

Item Number & Unit of Measure

Item Number	HIL0304906
Unit of Measure	1 gal Bottle

Specifications

Color	Yellow
Fragrance-Free	Yes
Fragrance	No Added Odor
Formula Type	Liquid
Requires Dispenser	Yes
PH	> 7 - < 9 (10%

EPA Registration #	7048-15-1658

Safety

See safety datasheet (if applicable) and product label for safety information, handling and proper use.

Directions for Use

LAUNDRY SANITIZER
Add 3 oz. of Laundry San 80 in high efficiency applications per a maximum of 100 pounds of fabric dry weight to sanitize laundered fabrics in the rinse cycle. A minimum cycle time of 5 minutes is required.

RESIDUAL BACTERIOSTATIC
Initial Treatment: Use 0.56 oz. (3.5 teaspoons) of Laundry San 80 for a minimum 24 hours holding in commercial or industrial applications per a maximum of 100 pounds of fabric [dry weight]. Dilute the appropriate amount of Laundry San 80 in one to two gallons of water and then add this solution to the wash wheel at the beginning of the final rinse cycle. A minimum rinse cycle time of 10 minutes is required. Repeat treatment: Follow Initial Treatment directions and re-treat fabric after each washing or if odor persists.

RESIDUAL SELF-SANITIZING
Use 0.6 oz. of Laundry San 80 in commercial or industrial applications per a maximum of 100 pounds of fabric dry weight. Dilute the appropriate amount of Laundry San 80 in one to two gallons of water and then add this solution to the wash wheel at the beginning of the final rinse cycle. A minimum rinse cycle time of 8 minutes is required.
