

IT'S ALL ABOUT MAKING IT PERSONAL

C.H. Hanson® was founded in 1866 by Christian Henry Hanson. He traveled from Denmark to the U.S. to apply his trade of stencil cutting. At that time, all stencils were hand cut and every one was unique.

Today, Hanson has evolved into a world-class marking company. We manufacture steel stamps, ID tags and yes... we still make stencils.

And while we have several thousand general marking products ready to ship (phrases, numbers, letters), we also offer customized solutions for pretty much any need - like yours.

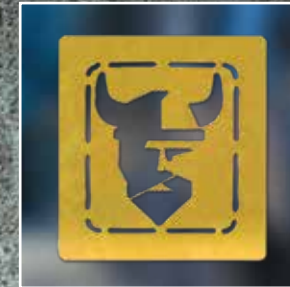

If you can envision it... we can probably come up with a marking solution custom tailored to solve your unique problem.
