Original Issue Date:	August, 11, 2021	Contact Phone:	1-888-721-8324
Revised:		Contact Email:	hearthsupport@napoleon.com
Model or series affected	BL36NT-1 / BL46NT		

To our valued Hearth partners:

PIB#: **TBF-005N**

SUBJECT: **Adding Millivolt to the Ascent Linear Line**

Valued Napoleon Hearth Customers,

In response to the unprecedented global supply chain backlog and to provide our customers with product where possible, Napoleon will begin offering a millivolt alternative on the BL36 and BL46 models for sale in geographic regions that permit the use of millivolt technology. While this change does not affect the overall look or performance of the fireplace, it is something you need to be aware of from a sales, service, and installation standpoint.

We want to ensure your team is aware of some differences between the millivolt models and the electronic ignition versions. Knowing these differences will be key to providing clear communication with your customers.

Visually, you will notice the use of a standing pilot in lieu of the intermittent pilot used on the electronic ignition versions. There is also no control board as the on/off function of the burner is controlled by a wall switch or F45/F60 remote (not supplied).

Please advise your sales team that the EFCN/EFCP remote option will not be available with the millivolt models. You will also need to be aware that the following options for these models are different, and ask them to refer to the list below.

Model #	BL36NT-1	BL46NT
NG-LP Conversion Kit	W175-0416	W175-0760
Power Vent Adapter Kit	PVA-ASCENT	PVA-ASCENT

If you have any questions regarding this bulletin, or any other concerns, please contact our Hearth Customer Solutions Department at 1-888-721-8324
