UCC15NPRII

15" Built-In Gourmet Clear Ice Maker

INSTALLATION INFORMATION

The ice machine can be used free-standing or as a built-in, under the countertop.

The ice machine requires a 115 Volt or 110 Volt, 60 Hz., AC only power supply, with an individual, properly grounded branch circuit, protected by a 15 amp fuse or circuit breaker.

Pump Kit UPK4 can be installed, which can force drain water up to a maximum of 10 feet, allowing it to be located where a gravity drain isn't available.

To achieve a custom appearance, the ice machine door accepts 3/4" custom panels to coordinate or contrast with cabinetry. Optional door panels and handle kits are available. Order PKIUG150RSS for stainless steel door panel kit with Profile handle. CKIUP150RS1/D1/W2 for stainless steel, matte black and matte white door panel kits with Café handle. ZKIUN150RS for stainless steel door panel kit with Monogram Statement handle. (Monogram handles sold separately - see list of model numbers below).
