

The WALTER SHOP program stands as our proprietary approach designed to help you maximize operational efficiency across all sectors of your metalworking business.

OUR APPROACH

1. Assessment

Pre-visit meeting and comprehensive plant walkthrough, to gather information on actual challenges, bottlenecks & production needs, current processes & applications, safety requirements and more.

2. Analysis

Evaluation of gathered observations and feedback using comparative benchmarking and metalworking expertise to quantify potential improvements.

3. Technical Report

Comprehensive report with recommendations to help solve current challenges and improve processes, with products, systems or working techniques intended to deliver on your most important goals.

4. Commitment

We work closely with the customer to ensure the seamless implementation of the recommended products and solutions.

5. Measure True Impact

We continue to monitor the success & performance of our recommendations to help sustain improvements.

THE RESULTS YOU CAN EXPECT

Focus from our expert team on your identified challenges and potential areas of improvement to ensure a relevant assessment that results in pertinent recommendations aimed at enhancing your current processes.

**PRODUCTIVITY
IMPROVEMENT**

Recommendations tailored to align with your current business environment and jointly identified measures of success to provide guidance for driving meaningful outcomes.

**TAILORED TO YOUR
