

THERMAL TRANSFER PAPER

ITEM 9555

Dynarex Thermal Transfer Paper features four-layer construction to support clear, precise stencil transfers. Each sheet includes a master layer for design application, a removable protective sheet, a carbon layer for transferring the image to the skin, and a yellow backing sheet to hold the layers in place. Ideal for producing clean, consistent outlines with rich, dark color while helping to keep hands and clothing free of carbon residue.

- Premium transfer papers designed to produce clear, well-defined stencil designs
- Four-layer construction: master sheet, removable protective sheet, carbon layer, and yellow backing sheet
- Designed to create crisp, clean copies with dark color
- Features protective layer to help keep carbon off hands and clothing
- 100 per box
