

How to Use Dritz®

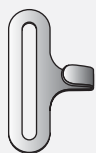

Bow Tie Set

Bow ties are fun for all ages and all genders! Use fun fabric for a quirky style statement or serious silk to dress up for more special occasions.

To make a bow tie you will use the hook, eye and slide adjuster parts of the set with a 5/8" strap. The strap can be made from the fabric of your choice or from Dritz 5/8" wide fold-over elastic.

Bow Tie Set Parts, Item #91

Hook

Eye

Slide adjuster

How to make a bow tie:

1. Slide one end of the strap around the center bar of the slide adjuster. Stitch end to secure.
2. Slide the opposite end of the strap through the eye and back toward the slide adjuster.
3. Pass that end back through the slide.
4. Pass the end through the hook (hook facing downward) and stitch the end in place. Adjust slide to fit.
