EMB II SERIES

DF10

SOLD AS EACH

The DF10 Ultra-slim subwoofer is a down-firing 4" tall cabinet thin enough to slide under a sofa, coffee table, amour or display cabinet. The cabinet is constructed of 5052 marine-grade aluminum. The subwoofer features a proprietary James designed high excursion, slim 10" woofer with a honeycomb cone and santoprene surround for reliability and the ability to withstand harsh environments. Available in 8 ohm however, 70V options are also available.

## KEY FEATURES

The DF10 subwoofer has been tuned to perform from 27 Hz to 150 Hz. We recommend pairing it with our M1000 Class D Amplifier which provides 1000W of clean power and features a full DSP digital processor. The DF10 is designed as an 8 ohm system and can power a total of two DF10 subwoofers with a single M1000 amplifier.

For outdoor and marine applications, order the DF10-M which features a tough exterior powder coat for these harsher environments.

Aluminum Enclosure

---

## FEATURES AND BENEFITS

- Sturdy aluminum cabinet design
- Available as marine grade (Down Firing models only)
- IP65 Rating
- Can be ordered in low impedance or 70V
- Passive subwoofer (requires amplification)
- TAA Compliant
- Custom colors are available, contact JAMES for details
