E*STAR® KEYSTONE PATIENT GOWN

Healthcare Apparel by Standard Textile

Give your patients
the comfort they deserve.

E*STAR® KEYSTONE PATIENT GOWNS PROMOTE A VERSATILE AND COMFORTABLE PATIENT EXPERIENCE.

Made with soft woven 100% polyester fabric, our E*Star® Keystone gowns provide exceptional durability, comfort, colorfastness, and faster dry times.

The gown features a generous sweep and convenient side ties to further patient modesty. E*Star® Keystone patient gowns use non-metallic plastic snaps that are better suited for MRI applications. A color band feature helps to easily identify sleeves for gowning patients. E*Star® Keystone plastic snaps are engineered to withstand the heat and intensity of commercial laundering.

Our E*Star® Keystone patient gown is specifically engineered to reduce energy consumption during the laundering process, when compared to conventional textiles. These energy and cost efficiency advantages are combined with our characteristic attention to comfort and functionality.

E*Star® Keystone patient gowns also further our commitment to help customers become more sustainable, reducing their environmental impact with reusable textiles that are more efficiently laundered.
