# STUDIO

---

Story has always been important to us. It is what has driven us from the very beginning and it is what continues to inspire us today. Our story begins with porcelain tiles, surfaces that are both technically excellent and beautifully satisfying to the eye. Studio is a testament to our commitment to creating products that are both functional and aesthetic.

The Studio collection from VITL is a rich and versatile series of retro-modern tiles and mosaics with a new contemporary color palette expressed across three segments: tiles and trims with classic shapes, mosaics, and spectacular patterned mosaics. Available in both matte and glossy finishes, tiles and trims are well-suited for a variety of contemporary wall installations.

Water Absorption (ASTM C373 or ISO 10545-3)	10-18%
Certifications	N/A
Country of Origin	N/A
Shade Variation Code	V1

## PORCELAIN CARE & MAINTENANCE

### INITIAL CLEANING

Proper cleaning after installation is essential for future maintenance. Remove excess grout using clean water and a sponge. If grout leaves behind a white haze, it can be wiped off using a clean cloth after grout has cured. Stubborn residue may require the use of a grout haze remover solution or neutral detergent. Thoroughly rinse the area with clean water and dry with a clean towel or wet vacuum.

### ROUTINE MAINTENANCE

Immediately wipe up any spills and clean the area using a damp cloth or sponge. Remove loose soil using a broom or vacuum. To remove stubborn surface debris, use a scraper or putty knife. Wipe the area with a PH-neutral and soapless cleaner. Rinse with clear water and wipe dry to prevent residue. Do not use cleaning wax, oil-based cleaners, ammonia, sealants, or products containing acid or bleach for routine maintenance. Avoid using abrasive cleaning products such as steel wool.

## CERAMIC CARE & MAINTENANCE

Glazed tile products should be cleaned routinely with an all-purpose, low VOC, household or commercial cleaner. The product chosen should also be grout joint cleaning compatible. The type of product may vary depending on the tile application and use. A multipurpose spray cleaner, which removes soap scum, hard water deposits and mildew designed for everyday use can be used on wall tile areas in residential baths and showers. A cotton mop, cloth, sponge, or non-metallic brush should be used to apply and agitate cleaner. Rinse the area with clean water and dry thoroughly. Routine cleaners should never contain harsh chemicals as these can damage tile. Acids can damage grout and the glazed surface of the tile. Ammonia can discolor grout.

Regular dust mopping, sweeping, or vacuuming is recommended prior to cleaning with liquid products.

Unglazed tile should be cleaned routinely with concentrated tile cleaners with a neutral pH for safe regular use. These cleaners are better suited for removing grease, oils, and normal spills from unglazed products. Again, these products will vary depending on the application, amount of traffic and the use. The product chosen should also be compatible with the grout.
