This page lists all the contents included in the box. Please take the time to identify the hardware as well as the individual components to this product. As you unpack and prepare for assembly, place the contents on a carpeted or padded area to protect them from damage.

- 1** Place Seat (B) upside down on a smooth carpeted surface. Tighten Left Front Leg (C) and Right Front Leg (D) on the corner of Seat (B) by Bolt (H), Lock Washer (J) and Flat Washer (K) with Allen Wrench (M).

Take the Allen Wrench and turn the bolts until the legs are secured. **DO NOT TIGHTEN COMPLETELY.** Stop when you feel you are adding force to tighten the bolts.

- 2** Put Left Stretcher (E) and Right Stretcher (F) between back leg and front leg. Tighten Seat (B) on Chairback (A) by Bolts (G) & (I), Lock Washer (J) and Flat Washer (K) with Allen Wrench (M).

- 3** Fix Left Stretcher (E) and Right Stretcher (F) on legs by Screw (L) with Phillips Head Screwdriver (not provided).

Stand chair up on an even surface and check that it is balanced. If there is a slight wobble, apply downward pressure in the corner where a leg is uneven. Keeping pressure in that corner, tighten all bolts. If balanced, apply downward pressure evenly in the center and tighten all bolts. Do not over-tighten beyond hole depth.

Helpful Tip:

-Instead of applying downward pressure while reaching under to tighten bolts, have someone sit on the chair while you tighten the bolts.

Cleaning & Care

Treat surface with care. Surface is resistant to scratches but is not scratch resistant. Clean surfaces with a dry or damp soft cloth. Do not use abrasive cleaners. Hardware may loosen over time. Periodically check that all connections are tight.
