Frequently Asked Questions

What is the difference between Spotlight Cam Plus and Spotlight Cam Pro?

Ring Spotlight Cam Plus includes Live View, Two-Way Talk, Advanced Motion Detection, Customizable Motion Zones, Customizable Privacy Settings, Color Night Vision, and an easy to use app. Ring Spotlight Cam Pro builds upon all these great features with a new design and advanced features including radar-powered 3D Motion Detection, Bird's Eye View, Audio+ for enhanced audio, HDR video, and dual-band Wi-Fi.

Can I mount Spotlight Cam Pro on an overhang or eave?

Yes. For step-by-step mounting instructions, please check out the Setup Guide included with the camera.

What is 3D Motion Detection?

3D Motion Detection uses radar technology to identify where and when a motion event will be recorded. The radar sensor measures distance and angle of objects in front of the camera, allowing for more specific motion detection alerts. Within the Ring App, users easily customize where on their property they want the camera to start recording when an object crosses a threshold. And, once 3D Motion Detection is set up, it powers Bird's Eye View which provides an aerial map view of motion events in front of the camera and clearly shows the path that visitors take when visiting the property.

What is Ring Protect?

Ring Protect is a comprehensive optional subscription service that lets you review, share and save every video and photo captured by your Spotlight Cam Pro, plus a few extra perks. To compare and learn more about Ring Protect visit <https://ring.com/protect-plans> to choose a plan that works for you.
