VRS

Vibration Reduction System™

(VRS) helps stabilize and reduce lingering riser vibration by up to 25% from the motion of shooting an arrow allowing for a smooth and quiet shot

EKO Cam Technology

allows let off customization to four different positions (75%, 80%, 85%, or 90%)

Align Lok™ Technology works in conjunction with bow sight to aid in aligning second and third axis levels

REDEMPTION

This 31" axle-to-axle bow hits the sweet spot for ultimate maneuverability and supreme accuracy making it the perfect choice for any tree stand, hunting blind, or spot and stalk scenario. This lightweight bow is only 4.1 lbs. and the 6.25" brace height makes for the ultimate shooting experience. The Redemption EKO ships with the VERSAGRIP™ for a smaller profile and reduction in torque and NAROGRIP™ to fit your hand precisely for a more accurate shot along with a limb stop to dial in your custom fit and feel. The VRS dampening system helps stabilize and reduce lingering riser vibration from the motion of shooting an arrow.
