

SS-705 Microphone

The SS-705 is an outdoor rated mic level microphone with an omni-directional pickup radius of approximately 12 feet. Housed in a weather resistant enclosure, the SS-705 is suitable for outdoor applications. The SS-705 does not require external power and is compatible with select IP cameras featuring a mic level audio input. The microphone includes 40 feet of cable with a 3.5mm plug. The cable may be threaded through either the top or rear of the enclosure.

Product Features

- Weather Resistant Enclosure for Outdoor Applications
- Mic Level Audio Signal - No External Power Supply Required
- Includes 40 Feet of Cable with a Pre-Terminated 3.5mm Plug for Fast Installation
- Can be Surface Mounted or Connected with 3/4" Threaded Conduit

Product Specs

FREQUENCY RESPONSE: 50Hz - 16kHz	SIGNAL TO NOISE RATIO: 60dB
SENSITIVITY(1M,1W): -30dB	OUTPUT IMPEDANCE: 2.2k Ohms Max
POWER REQUIREMENTS: <.5mA @ 1.5VDC	DIMENSIONS: 2.8"w 4.6"h 2.2"d
WEIGHT: 1 LB	OPERATING TEMP RANGE: -20C - +60C

INSTALLATION INSTRUCTIONS

1. Connect the microphone cable to the IP camera audio input. In the event that the camera's audio input is a terminal block, use a 3.5mm to bare wire adapter (not supplied) or cut the connector and strip the wire. Connect the white wire to ground and the red wire to signal. Do not connect the microphone to 12Vdc power.
2. Ensure that the camera's audio settings are set to "mic in." Most IP cameras' default setting is "line in" which when used with the SS-705 will result in faint or inaudible sound.
