

FLUIDMASTER® 7513

EXTRA-THICK NO.10 WAX RING

INSTALLATION INSTRUCTIONS

INSTALLATION INSTRUCTIONS:

- Be sure wax gasket is at least 70°F temperature to insure proper flow of wax.
- Press wax gasket over horn outlet of toilet bowl, extending plastic flange away from the bowl.
- Set bowl in place and use body weight to compress wax ring.
- Twist bowl slightly to spread wax.
- Tighten flange bolts carefully to prevent breaking the bowl.
