AUTOMATIC VOLTAGE REGULATOR

Battery Back-up Systems with intelligence!

Dependable, yet affordable, the CPS825AVR automatic voltage regulator not only guards against surges, spikes, sags, brownouts and other power abnormalities, but also provides battery backup power. Automatic Voltage Regulation keeps the power to your computer at a consistent level, helping to prevent lockups and protect and prolong the life of valuable computer components.

PowerPanel Plus™ Software is included. In the event of a power outage, PowerPanel Plus™ Software automatically logs and saves all open files then shuts down the computer system in an intelligent and orderly manner.

What is AVR?

Automatic Voltage Regulators increase low or decrease high voltage to a consistent and computer-safe 110/120 volts. The CPS825AVR automatically provides battery backup power if the incoming line voltage drops below 85 volts or exceeds 150 volts.
