

CPAP TUBING

Dynarex Resp-O₂™ CPAP Tubing is designed to provide effective, durable performance for users of CPAP, APAP, and bi-level systems. Featuring a smooth interior, the tubing facilitates unobstructed airflow, contributing to efficient and effective sleep therapy. Constructed from durable plastic materials, the CPAP Tubing is built to withstand regular use while maintaining flexibility and ease of movement. The lightweight design minimizes drag on the mask, improving user comfort and reducing the likelihood of mask displacement during sleep. Available in multiple lengths, the tubing accommodates a variety of comfort needs and preferences. Each tube is equipped with 22-mm cuffs, providing universal compatibility with most CPAP masks and machines.

- Made from premium, durable materials for optimal longevity and reliability
- Flexible design allows for ease of movement during sleep and convenient storage
- Features a smooth interior for optimal airflow and easy maintenance
- Lightweight design minimizes drag on mask, reducing the risk of displacement during sleep
- Equipped with 22-mm cuffs for universal compatibility with most CPAP masks and CPAP machines
- Available in 4', 6' and 8' lengths for optimal patient comfort
- Not made with natural rubber latex
